A Companion to Chinese Art
These invigorating reference volumes chart the influence of key ideas, discourses, and theories on art, and the way that it is taught, thought of, and talked about throughout the English-speaking world. Each volume brings together a team of respected international scholars to debate the state of research within traditional subfields of art history as well as in more innovative, thematic configurations. Representing the best of the scholarship governing the field and pointing toward future trends and across disciplines, the Blackwell Companions to Art History series provides a magisterial, state-of-the-art synthesis of art history.
