Interest Rate Markets
Founded in 1807, John Wiley & Sons is the oldest independent publishing company in the United States. With offices in North America, Europe, Australia, and Asia, Wiley is globally committed to developing and marketing print and electronic products and services for our customers’ professional and personal knowledge and understanding.

The Wiley Trading series features books by traders who have survived the market’s ever-changing temperament and have prospered—some by reinventing systems, others by getting back to basics. Whether the reader is a novice trader, a professional, or somewhere in between, these books will provide the advice and strategies needed to prosper today and well into the future.

Acknowledgments

This work is the outcome of inspiration, training, and support I received from so many colleagues, friends, and family. Much as I am deeply indebted to them, I cannot possibly mention them all in the short space here. To name just a few, Pavan Wadhwa and Srin Ramaswamy helped me understand markets in a thorough and logical manner throughout my career. I would like to thank Ross Jackman and Russ Mannis for their encouragement at the start of my career in municipals. My discussions about finance with colleagues such as Manas Baveja and Anthony Heading over the years have been instrumental in addressing any doubts in my thought process. I also want to acknowledge Kelly for her unwavering support.

A number of individuals took the time to perform the arduous task of editing and offered advice on content. Specifically, I want to express my gratitude to my dad and to Hitomi Kimura for their assistance.

Last, but definitely not least, I would like to thank the editing staff at Wiley who took the time to thoroughly edit my manuscripts. In particular, I thank Laura Walsh, Judy Howarth, and Laura Cherkas for their assistance with the whole publication process.
